

# Family Medicine State Fact Sheet in Oklahoma

Family medicine is the only medical specialty in which physicians are trained to provide continuing, comprehensive health care for people of all ages and genders, treating each organ system and every disease entity. No other medical specialty covers the broad range of primary care services that family medicine does.

*Family medicine is based on a philosophy of caring for the whole person and a continual emphasis on family, community and environmental context, making it the ideal specialty to care for America's most vulnerable and underserved communities.*

## Family Physicians in the U.S. Health Care System

More Americans depend on family physicians than on any other medical specialty. AAFP members are the main source of primary health care for the Medicare population and see a large proportion of new Medicaid beneficiaries.<sup>1</sup>

Accepts new Medicare patients

**86%**

Accepts new Medicaid patients

**70%**
