

# Letters to the Editor

Send letters to Kenneth W. Lin, MD, Associate Deputy Editor for *AFP Online*, e-mail: [afplet@aafp.org](mailto:afplet@aafp.org), or 11400 Tomahawk Creek Pkwy., Leawood, KS 66211-2680.

Please include your complete address, e-mail address, and telephone number. Letters should be fewer than 400 words and limited to six references, one table or figure, and three authors.

Letters submitted for publication in *AFP* must not be submitted to any other publication. Possible conflicts of interest must be disclosed at time of submission. Submission of a letter will be construed as granting the American Academy of Family Physicians permission to publish the letter in any of its publications in any form. The editors may edit letters to meet style and space requirements.

## Homeopathic Remedies for Treatment of the Common Cold

**Original Article:** Treatment of the Common Cold in Children and Adults

**Issue Date:** July 15, 2012

**Available at:** <http://www.aafp.org/afp/2012/0715/p153.html>

TO THE EDITOR: This article does not mention homeopathy as a complementary and alternative medicine treatment for the common cold. In fact, there is evidence suggesting that homeopathy could be useful for this condition.

Complex homeopathic remedies have shown effectiveness for the common cold,<sup>1,2</sup> as have individualized homeopathic remedies for children.<sup>3</sup> In another study, self-treatment was shown to be effective.<sup>4</sup> There are also studies suggesting that homeopathy could be effective for preventing the common cold.<sup>5</sup>

TIMOTHY FIOR, MD  
Lombard, Ill.

IN REPLY: We thank Dr. Fior for considering another intervention for the common cold. Unfortunately, the studies that Dr. Fior cites have various methodologic flaws (e.g., different combinations of products used in the same study, nonrandom assignment of patients, no placebo-controlled arm) that preclude conclusions about effectiveness. A systematic review of two trials found that homeopathic treatments are no better than placebo for the treatment of upper respiratory tract infections in children.<sup>1</sup> Although we provided information in our article about several complementary and alternative medicine products that have benefits for the common cold, more rigorous study of individual homeopathic treatments is needed.
